

TenAsys has identified your company as an account that uses the TenAsys License Portal to obtain target host licenses.

We want to inform you how a pending update to the license infrastructure for TenAsys products affects your account.

If you use individual Entitlements (or SUACs) exclusively to obtain licenses, the only change is cosmetic. The graphics presented to select from available products and pasting the fingerprint of the target host change, but the process and result remains the same.

Screen shots of the old vs. new process are detailed below.

Using an Entitlement on TenAsys License Portal before update (activate.tenasys.com):

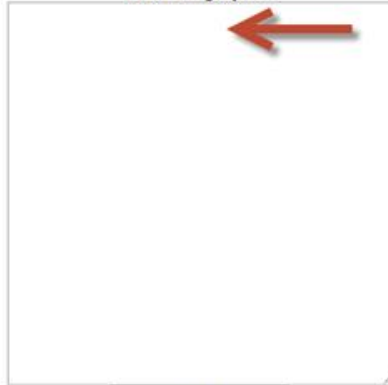

INtime® Real-time for Windows

License Generation

Select the license type

1 INTIME4RT activation(s) remaining.

Enter Fingerprint

Validate

Generate License Code

Click on the button to generate license code

Generate License
